

## 2017 Summer Camp Descriptions

---

**GONE TO THE DOGS:** Join us for a week of fun and adventure as we learn all about dogs! Campers will meet a variety of dogs each day, learn basic dog and puppy care, meet dog trainers, and gain hands-on dog training skills. We will explore the world of working dogs, service dogs, animal welfare, and animal rescue.

**ALL THINGS ANIMALS:** Animals live all around us and share the world with us. Campers will learn about some of the most fascinating animals in the world, where they live and how they survive. Begin the week as an Animal Forensic Scientist and throughout the week explore the life many animals. Many guest speakers and interesting animal visitors will join you each day.

**CRAZY FOR CATS!** Learn how cats became our best friends! Spend a whole day with kittens and learn how to take care of them. Find out how many different kinds of cats there are! Are Big Cats related to our household friends? What is a cat's favorite thing to do? We will explore the world of cats and learn what it is like to live like a cat. Fun cat-crafts, cat-games, cat-snacks and crazy cat videos are in store for our Crazy For Cats Campers!

**DOWN ON THE FARM:** Explore Animals in Agriculture beginning with the soil and sun. We all need farms for food, fiber and so much more. Youngsters will meet livestock with each day's theme. From "Egg-citement" to "Dairy Day", "Wild and Woolly" to "Horsing Around", each day is a hand on exploration of life in the barnyard, including crafts, music and farm fresh snacks.

**WAGS TO WHISKERS:** This full filled camp is for children 4 -6 years old. It will be a week of learning about all of the pets of all sorts and how they are cared for. We will have special guests, fun themed snacks and crafts, games and activities on the pet of the day and of course animal visitors.

**JEEPERS CREEPERS:** Creeping Crawlers are all around us! Campers 5-9 years old will learn why even the creepiest creature is essential to our world. We will discuss the ecosystems, food web, adaptations and habitats of a great variety of animals from insects and worms to snakes and lizards and even bats. Meet experts from a variety of fields who handle these animals on a daily basis and join the fun!
